SUMMARY

Computer Engineering student with strong skills in software development and web technologies. I have experience in creating innovative solutions through projects and hackathons. My goal is to secure a Full Stack Developer position where I can grow and contribute to impactful projects.

EXPERIENCE

Intern

Bluestock Fintech

Online mode

03/2025 - 04/2025

Intern for Software Development Engineer

- Worked on a financial analysis project involving data processing and visualization. Contributed to machine learning tasks such as model development and performance evaluation to support predictive insights in the fintech domain.

Intern

Web Stack Academy

Online Mode

08/2024 - 09/2024

Intern for Web Development Using MERN

- Developed a full-stack "Food Delivery Application" using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented features like user authentication, order tracking, Dynamic Sorting, menu management, and payment integration.

Intern

Dhrumi Technologies

Online mode

07/2022 - 09/2022

Intern for Web Development

- Developed a 'Food Ordering and Restaurant Booking System' using Django, including features like user-friendly interfaces, a dynamic backend, and payment gateway integration for seamless transactions.
- Implemented separate categories for restaurants and hotels, allowing users to join as either, with a dedicated dashboard for each and ensured a smooth, bug-free experience by integrating core functionalities and optimizing performance.

EDUCATION

B.E. in Computer Engineering

SVPMCOE, Malegaon

CGPA: 9.02

08/2023 - 07/2026

Baramati, Pune

Diploma in Computer Engineering

Government Polytechnic, Pune

Percentage: 83.6

08/2020 - 07/2023

Shivajinagar, Pune

KEY ACHIEVEMENTS

- Achieved Runner Up in Cretechnova 2024 and Top 10 Finalist position in CodeClash competitions. Earned multiple scholarships including NMMS, Cummins Nurturing Brilliance, Bharat Forge, and LPF, showcasing academic excellence.

CERTIFICATIONS

- Data Structures & Algorithms
- Generative AI
- Data Science & Machine Learning
- Operating Systems

SKILLS

Python	JavaScript	Django	GitHub
Java	Angular	Bootstrap	Git
PHP	React	SpringBoot	Postman
C++	SQL	Teamwork	Tailwind CSS
Android	MongoDB	Troubleshooting	Creativity

PROJECTS

E-commerce Website Using SpringBoot, AngularJS

03/2025 - 05/2025

- Developed a full-stack platform enabling users to register, browse, and purchase items with a secure & responsive UI.
- Implemented user authentication, role-based access, and dashboards for admin using JWT.
- Integrated payment gateways and ensured smooth transactions with a focus on performance, security and load balancing.

SoulSync - Organ Donation System Using PHP

02/2025 - 03/2025

- Built a web app to facilitate organ donor & recipient registration, matching, and management with a role-based login system.
- Designed a responsive interface with admin controls for user, hospital, and organ data management, ensuring secure access and efficient data handling.

YouTube Clone Using Django

02/2025 - 03/2025

- Built a web application replicating YouTube's core functionality with features like video uploading, viewing, commenting, subscribing, search, and seamless notifications.
- Implemented user authentication and ensured a smooth user experience across all interactions.

Employee Management System Using Django

01/2023 - 12/2023

- Developed an E-commerce Website featuring a redeemable credit point system based on employee performance
- Integrated robust authentication and validation mechanisms to ensure secure and seamless user experience

ChatGPT Using Android

01/2022 - 12/2022

- Developed an AI-powered Android application, a user-friendly interface for seamless communication and designed backend functionalities to respond to user queries in real-time.
- Focused on optimizing app performance and ensuring a responsive user experience.
